UHC AMBASSADOR AGREEMENT

Through industry collaboration, the UHC promotes education and options for at-risk and transitioning horses.

The United Horse Coalition does not take a position on federal or state legislation related to equine slaughter in the United States. This has been, and continues to be, an extremely complex issue. We remain neutral and focus instead on how we can make the biggest impact – by concentrating our resources on our ultimate goal of promoting responsible ownership and *preventing* horses from becoming at-risk.

By volunteering for our Ambassador program, you represent the UHC and offer your knowledge about the issue of at-risk horses. We understand that everyone who has joined this program is committed to helping horses by teaching responsible ownership and providing factual information on the problem. In light of this commitment, we are asking that as a UHC Ambassador and representative, you acknowledge this agreement to educate the public in a responsible, educational, and non-biased manner.

Prior to forwarding the presentation files, we ask that you please sign, scan, and then return the following acknowledgement via email to Ashley Harkins at UHC@horsecouncil.org.

Thank you. If you have any questions about this, please contact us.

ACKNOWLEDGMENT

I, _____, when representing the United Horse Coalition, agree to give the UHC presentation without my personal opinion of any federal or state legislation and will educate my audience on the issues pertaining to the problem of at-risk horses or those in transition and what it means to “Own Responsibly.”
